

Frequently Asked Questions

Mini Split

What is the difference between the 12,18 & 24 series?

Any model number with “**12-**” in the beginning has a height of **12”** off the ground.

Any model number with “**18-**” in the beginning has a height of **18”** off the ground.

Any model number with “**24-**” in the beginning has a height of **24”** off the ground.

What are the widths of the mini split stands?

There are three different widths for all of the mini splits.

Any mini split model number that ends in “**-00**” is a “thin” width, 14-11/16”. Any mini split model number that ends in “**-01**” is a “wide” width, 18-3/16”.

Any mini split number ending in “**-02**” is a dual fan rail and is a width of 26”.

Any mini split number ending in “**-03**” is a double stack unit and is a “wide” are, 18-3/16”.

What is the dual fan stand?

The dual fan stand is designed to accommodate dual fan units. They are similar to the standard mini split stand but have a different cross arm to better support the larger units. The dual fan unit is available in 12”, 18” & 24” heights, 1202/1802/2402.

Are you able to stack mini split units?

Quick-Sling makes a double stack stand to allow for safe, and stable stacking, 1203.

What is the foot print of the mini split stands?

The “**thin**” or “**-00**” models are 37-1/2” X 17-11/16”

The “**wide**” or “**-01**” models are 37-1/2” X 21-3/16”

The **dual fan** or “**-02**” stands are 37-1/2” X 30-3/16”

The **double stack stand** or “**-03**” are 37-1/2” X 21 3/16’
